EXPERIENCE

Lead Full Stack Developer

February 2025 – October 2025

Startviral, Remote

Typescript, ReactJS, React Router, TailwindCSS, PostgreSQL, EffectJS

- Led a multi-system integration effort connecting payment, CRM, inbox, social, and workflow tools (Stripe, Pipedrive, Front, Instagram, Asana, Make) into a cohesive operating layer that managed hundreds of customers end-to-end
- Contributed to **\$3k+ worth of monthly revenue** by building a full stack [pricing page](#) from scratch
- Engineered internal tooling to manage millions of data entries with **millisecond processing times**
- **Optimized test runtime by 200x** by migrating to Prisma ORM after finding measureable performance gains

Software Engineer - PEY Intern

May 2023 – August 2024

Intel Corporation, Toronto, ON

C++, Python, Perl, TCL

- Created a scalable architecture for **6 systems**, solving a critical netlist propagation bug and paving a path for **framework centralization**
- Improved design validation by developing new netlist legality checks and an analytics report
- Drove an increase in developer productivity by pioneering a new internal framework that streamlined the implementation of key features across projects
- **Won third place** in an internal Competitive Programming competition for solving challenging problems

Technical Executive

November 2022 – Present

Deltahacks, Hamilton, ON

Typescript, ReactJS, NextJS, TailwindCSS, PostgreSQL

- Enhanced developer experience by redesigning and implementing a customizable form database table
- Built the schedule page and Google Wallet features used by **300+ participants** for streamlined event management
- Led development of the Deltahacks IX landing page and grading page, overseeing **1300+ applicant** volume by leveraging React, shadcn/ui and Tailwind CSS

Project Code Quality Lead

December 2024 – January 2025

Datacurve, Hamilton, ON

C++, Python, Java, JavaScript

- Directed code reviews and quality standards for **2000+ technical contributors**, impacting **multi-million dollar** LLM training operations leveraging expertise in C++, Python, Java, and JavaScript
- Led investigations into review quality, revising 58 rejected data points and **documenting new reviewer guidelines**
- Ideated innovative tools that improved review quality and productivity

Vice President

August 2022 – April 2023

McMaster Competitive Programming Club, Hamilton, ON

C++, Python

- Taught advanced data structures and algorithms for the **International Collegiate Programming Contest (ICPC)**
- Hosted an Intel sponsored competition resulting in **35** participants

Teaching Assistant

January 2025 - June 2025

McMaster University, Hamilton, ON

Automata and Computability Theory, Latex

- Conducting live classroom instruction to **300+ students** on Automata and Computability
- Redesigned lesson plans to enhance classroom engagement

PROJECTS

Price Matched | [Typescript, ReactJS, NextJS, Chrome, EffectJS, TailwindCSS](#)

August 2025 – Present

- Developing a chrome extension that finds better deals on products across Amazon, Aliexpress, and Temu in **0 clicks**
- Optimizing bottlenecks in the product comparison pipeline by profiling code, reducing load times to **2 seconds** for a smoother user experience

EDUCATION

McMaster University | 3.8 GPA

September 2021 – April 2026

Candidate for Bachelor of Applied Science, Computer Science

Hamilton, ON

TECHNICAL SKILLS

Languages: C++, Typescript, Python, Java, Javascript, HTML, CSS, L^AT_EX, C, Perl, SQL

Libraries and Frameworks: ReactJS, Tailwind CSS, NextJS, Prisma ORM, NodeJS, ViteJS, MongoDB, Payload CMS

Developer Tools: PostgreSQL, Docker, GitHub, Git, Jira, Perforce, Linux, Apache Maven
