EXPERIENCE

Web Developer

September 2021 - Present

McMaster Start Coding

Hamilton, ON

- Incorporated Elm's **HTML**, **CSS**, and **Widget** libraries to create abstract **GSVG graphics** with a focus on future maintainability.
- Handled URL redirects by applying Elm's **Url** library with its **MVC design pattern**.
- Remotely collaborated in a team of 7** by leveraging Github, GitKraken, Jira, Mattermost, and Zoom.

Executive and Data Structures and Algorithms Instructor

November 2019 - June 2021

Bur Oak Secondary School Programming Club

Markam, ON

- Managed and contributed to the development of club wide software application group projects.
- Discussed and organized for club events with administration and fellow executives.
- Assumed leadership roles to instruct 60** members of the club on data structures and algorithms.

COOPERATIVE EDUCATION STUDENT

September 2019 - January 2020

Longtech Computer Distributor

Markam, ON

- Negotiated with corporations and individual customers.
- Responsibly organized and refurbished a variety of products to a quality standard
- Collaborated with supervisors to organize shipments and deliveries with Microsoft Spreadsheets
- Assisted the product manager to consult, organize and refurbish computers for individual customers and corporations. I also collaborated with supervisors to organize shipments and deliveries.

PROJECTS

[e-bookshelf](#) | React Native, styled-components/CSS, Axios, NodeJS, ExpressJS

August 2021-Present

- Incorporated the **React Router** library to create a single-page app designed with **styled-components** for reading, storing, and searching EPUB files.
- Integrated JSX's form tag with **Axios** to retrieve a user's uploaded EPUB file and to post it into a local web server with an **HTTP post request**.

[Ani-List](#) | Java, Java Swing, Unirest, Apache Maven

July 2021

- Designed a social cataloging application for users to score and organize their anime preferences, incorporating **object-oriented programming** and the MVC architecture.
- Developed the **Apache Maven POM file** in order to automate the project building process.
- Implemented **Unirest to make HTTP REST requests** to the Jikan API for real-time information on anime.
- Fully Documented** the project structure
